

ChronoMechanik

Winding up the watch: Wind it up clockwise only till the stop (do not overwind)

Adjusting the time: Pull crown [2] and set time, push crown [2]

Adjusting the date: Pull crown [2] and fix hour hand to 11 hs; go on winding till hour hand passes 12 hs, date jumps 1 day; wind hour hand anticlockwise till 11 hs, than again clockwise passing 12 hs, date jumps another day; repeat procedure till the date desired has been set. Now readjust the time.

Stop function: Hand [5] remains in 12 hs position, exception: stop function start and stop vide button [1]; return hand vide button [2]; minutes stopped are indicated on stop-minute indicator [6]

Attention: Please activate the big stop-second indicator only to stop the time and if the watch is completely wound up!
